SUMMARY

Computer Science Engineering student with hands-on experience in full-stack web development. Completed an industry internship at Techpile Technology where I built responsive web applications, optimized UI/UX performance, and integrated APIs. Actively building projects that solve real-world problems and seeking opportunities to contribute in a fast-paced tech environment.

EDUCATION

Bachelor of Technology (B. Tech), Computer Science and Engineering
GL Bajaj Institute of Technology and Management • Greater Noida, Uttar Pradesh

September 2024 - June 2027
(CGPA: 7.5 / 10)

Diploma in Computer Science & Engineering
Mahamaya IT Polytechnic, Maharajganj, Uttar Pradesh

October 2022 - September 2024
(CGPA: 8.0 / 10)

SKILLS

- **Development:** HTML, CSS, JavaScript, Bootstrap, React.
- **Databases:** MySQL Server, NoSQL, MongoDB.
- **Cybersecurity:** Ethical Hacking, SOC Fundamentals, Network Security, Web Security, Red Team Basics, Blue Team Basics, Purple Team Basics.
- **Tools and Technologies:** Git, GitHub, Agile Methodology, Postman.
- **Platforms:** Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ IDEA.
- **Problem Solving:** Data Structures & Algorithms (DSA) with C++.
- **Languages:** C, C++, Python, Java.
- **Soft Skills:** Problem Solving, Communication Skills, Teamwork & Collaboration, Time Management.

PROJECT

UPI Fraud Detection System

Technologies: Python, Machine Learning.

- Developed a machine learning-based system to detect and classify fraudulent UPI transactions using supervised learning algorithms and Implemented data preprocessing, feature selection, and model training.
- Trained and evaluated multiple ML models including Random Forest and Logistic Regression to identify the best performing approach.
- Improved understanding of real-time fraud detection, pattern recognition, and financial security systems.

Finger Calculator using Computer Vision

Technologies: Python, OpenCV, MediaPipe, Machine Learning.

- Built a real-time hand gesture-based calculator that detects finger positions through a webcam and performs arithmetic operations, applied MediaPipe Hands library for precise hand landmark detection and finger counting to convert gestures into numerical values.
- Used OpenCV for live video streaming, frame-by-frame processing, and displaying results directly on screen.
- Created a gesture mapping system to identify digits and execute basic operations such as addition, subtraction, multiplication, and division.

PROFESSIONAL EXPERIENCE

WEB DEVELOPMENT INTERN

Techpile Technology Pvt. Ltd.

July 2023 - September 2023

- Completed intensive summer training focused on front-end web development.
- Developed 5+ responsive web pages using HTML 5, CSS 3, JavaScript and Python with 30% improvement in page load time through code optimization. Implemented frontend-backend integration using API and AJAX for seamless dataflow.
- Worked on mini projects to understand real-world development workflow. Optimized UI/UX components resulting in enhanced user experience and 25 % reduction in bounce rate.

CERTIFICATIONS

Cybersecurity Foundation – Palo Alto Networks Cybersecurity Academy

Cybersecurity Academy Orientation – Palo Alto Networks

Getting Started with MongoDB Atlas – MongoDB

UNXT (Soft Skill Development Program) – SGBS Unnati Foundation Verbal / Communication Skills Certificate

AWS Academy Graduate – Cloud Foundations
